Abstract

The specific sets of rules and Targets were introduced to lead a better world in 2015 by international community. The goals are sustainable involving economic, social, nutritional and environmental dimensions (UN 2015). The main target community of millennium development goals is developing nation. one of them is SDG-02 titled as “end hunger” or “zero hunger. It focuses on food security, healthy diet and sustainable agriculture. Agriculture production and food consumption is critical to any economy of developing countries. The extermination of hunger requires multiple factors to be focused on. The most important of them is sustainable agricultural practices (SAP). According to FAO sustainable agricultural production include practices that have economic, ecological and societal dimensions. These practices may increase production of food, water, soil preservation and carbon sequestration. Sustainable agricultural practices are perceived to be beneficial for farmers and environment. The practices reflect the modern methodologies which aim to protect ecosystem by adaptation to climate change and environmental variability. Hence the study concludes that SAP contribute to food security as well as availability of nutritious food which may play contributing factor to achieve zero hunger.

Keywords: Millennium development goals, FAO, sustainable agricultural practices, farmers, hunger

Additional information is available at the end of the article.

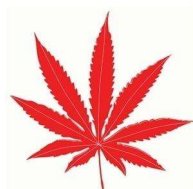

Ethics approval and consent to participate: No ethical approval needed for this research work.

Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/ or incorporated in this study is included in this manuscript.

Declaration

The abstract is reviewed and accepted by the Conference Organization Committee of 11th Pak Pharma Healthcare Expo. The presenter was permitted to share his research after final approval of the committee. The scientific research information was presented at 3rd Pakistan Food -Nutrition International Summit 2022 held on December 21-22, 2022 at Pak-China Friendship Centre, Garden Avenue, Islamabad, Pakistan. Hence, the journal is publishing this abstract on behalf of the aforesaid Conference Organization Committee.
