Conference Abstract

SEARCH FOR OPTIMUM SOCIETAL OUTCOMES-ANALYSIS OF EMPIRICAL EVIDENCE ON COHABITATION AND MARRIAGE

FARHAN KHOKHAR

Farhan Khokhar is a Graduate of Business and Finance. His interest is in exploring and establishing empirical evidence that confirms the validity of Islamic Teachings based on the Holy Qur'an, practice/sayings of Holy Prophet Muhammad (sa) and writings of the Promised Messiah (as). Presently he is serving as Vice-President of the Ahmadiyya Muslim Jama'at, Canada

Ethics approval and consent to participate: No ethical approval needed for this research work.

Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/ or incorporated in this study is included in this manuscript.

Key words: Optimum, Evidence, cohabitation

Abstract

The Holy Qur'an and practice of the Holy Prophet Muhammad (peace and blessings of Allah be upon him) presents the Institution of Marriage as the bedrock of society. The present society is increasingly moving away from organized religion & belief in Divine rules. Consequently, non-believers demand that faith-based groups demonstrate evidence of the validity of religious teachings to the secular mind. The presentation will analyze census data across jurisdictions (particularly in developed countries), and academic studies on socially & legally acceptable family unions, to establish if empirical data supports the Institution of Marriage (presented by the Holy Qur'an), as the preferred normative family union resulting in statistically significant desirable societal outcomes. The presentation will further explore socio-economic impact of family breakdown and contrast one increasingly common behaviour of cohabitation and its key societal outcomes with experience of marriage-based union.
