Conference Abstract

CANCER IMMUNOTHERAPY: A CURE WITHIN

MALEEHA QAZI

Dr. Maleeha A. Qazi completed her PhD in Biochemistry and Biomedical Sciences from McMaster University in 2019. In her PhD thesis, she described the development of a pre-clinical model of glioblastoma recurrence and used it to identify novel targets for the development of patient-specific immunotherapies, which was nominated for the Governor General Gold Medal. She is currently a first-year medical student at the University of Toronto School of Medicine, where she also serves as an Associate Editor for the University of Toronto Medical Journal. Maleeha aims to combine her research background with her medical training to advance our understanding of primary and metastatic brain cancer biology and develop new immunotherapies to improve brain cancer patient prognosis.

The phenomenal speaker present this research in 1st International The Holy Quran & Science Conference and Exhibition-2019, held in Mississauga ON Canada. The Conference Abstract is published on behalf of the decision of acceptance and approval of Conference Organizing Committee.

Competing Interest

The authors declare no competing interests.

Additional information is available at the end of the article.

Ethics approval and consent to participate: No ethical approval needed for this research work.

Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/ or incorporated in this study is included in this manuscript.

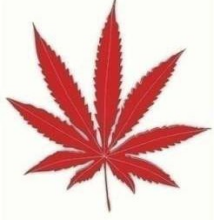

Key words: Cancer, Immunotherapy.

Abstract

Allah the Almighty says in the Holy Qur'an,
"And when I am ill, it is He Who restores me to health" (26:81)

Indeed Allah T'Allah, the Creator of all the worlds, has created various laws of nature and contravention of these laws may result in various forms of illnesses and evils that may afflict upon us. However, He is also the source of the cure for our physical, mental and spiritual illnesses, as Hadhrat Abu Hurairah (ra) narrates that the Holy Prophet (sa) said,

"There is no disease that Allah has created, except that He has also created its

treatment.” (Sahih Al-Bukhari).

This concept of creation of a cure for every disease can be very eloquently appreciated by learning about the current advances in immunotherapy for the treatment of cancer.
