

Conference Abstract

3rd The Holy Quran & Science Conference and Exhibition - 2016

1194 Matheson Blvd E Mississauga, ON L4W 1Y2 Canada

Conference Abstract

GRAVITATIONAL WAVES

Mohammad Shahab Khokhar

Subtitle:

Speakers Profile

Mr. Mohammad Shahab Khokhar is a theoretical physicist. He holds a Master's Degree in Physics with a focus on Gravitation and Cosmology. Mr. Shahab has a keen interest in the relationship of Qur'an and science especially in the context of forecasting discoveries and scientific advancements based on the Holy Qur'an.

Abstract

On September 14th, 2015 Gravitational Waves were detected directly for the first time. This triggered a renewed interest in perhaps the most complex of the fundamental forces; Gravity. This presentation explores what the Holy Qur'an says about gravity. Furthermore, how we can use the hints within the Holy Qur'an to one day ride the gravitational waves and derive a Grand Unification Theory by understanding how gravity works.
