Abstract

The Holy Qur'an is a living miracle, which presents proof of the existence of the All Powerful Creator. The claims are now backed by scientific research. From the orderly and balanced universe to the single cell organisms. The precise calibration of the laws governing the

Additional information is available
at the end of the article.

universe and the unraveling of the forces and interactions points to a single entity at its inception. Scientific advancements that impact on our life which were predicted centuries ago also lend support to the existence of the Creator. Belief in the unseen and the elusive jinn also direct our attention to the Creator.
