He is also Chair of Religion and Science for the Muslim Sunrise, the longest running Muslim publication in North America. He has authored more than 400 articles on Islam, Christianity, Secularism and Religion & Science. *Follow in Twitter: @The_MuslimTimes*

Abstract

Artificial intelligence could be “billions of times smarter” than humans in near future, the experts are predicting. Many popular movies are suggesting that at some point robots may also develop a soul. The speaker believes that humans will never have such mastery of soul, as this will create a serious challenge to the religious understanding of accountability and Afterlife.

Almost a billion, according to a BBC report, are suffering from anxiety and depression. There is an epidemic of drug abuse in US and other countries. The speaker believes that understanding of human psychology is not only absolutely necessary for our worldly survival but also our salvation in the Hereafter.
