Conference Abstract

EXPLORING INSIGHTS FROM THE HOLY QUR'AN FOR RESEARCH IN THE FIELD OF COGNITIVE SCIENCE AND SOCIAL NEURO SCIENCE

Dr. Altaf Qadeer

Dr. Altaf Qadeer is a Member of ESERA (European Science Education Research Association). He has served as Adjunct Professor at York University. Dr. Altaf Qadeer is currently working as a researcher at Department of Experimental Sciences, Faculty of Educational Sciences at Granada University, Spain.

Ethics approval and consent to participate: No ethical approval needed for this research work.

Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/ or incorporated in this study is included in this manuscript.

Key words: Cognitive, Social, Neuro Science

Speakers Profile

Dr. Altaf Qadeer is a Member of ESERA (European Science Education Research Association). He has served as Adjunct Professor at York University. Dr. Altaf Qadeer is currently working as a researcher at Department of Experimental Sciences, Faculty of Educational Sciences at Granada University, Spain.

Abstract

Holy Quran eloquently provides in interrelated ways a range of insights, ideas for future research and the guidance of Allah about human cognitive factors.

A growing pathway is to enrich research insights based on Holy Quran and apply them to the emerging fields of social neuroscience and cognitive neuroscience. The point of view Holy Quran provides is proven by many empirical studies in this field. As a result, this progress in research provides innovative ideas to conduct more

studies with interesting research questions for our current needs. This short presentation explains what it means for our future studies and the further progress of theory, research, and practice in the interdisciplinary fields.
