Conference Abstract

RESEARCH ASPECTS BASED ON THE HOLY QUR'AN

Dr. Hameed A. Mirza

Dr. Hameed A. Mirza has a Ph.D. in Metal-Organic Chemistry from University of Western Ontario London. He then moved to McGill University and did post doctoral fellowship in Protein Engineering Center of Excellence at Pulp and Paper Research institute. Since 2004, he is teaching at the Department of Chemistry at York University. Dr. Mirza is also involved in the applied research in area of Pharmaceutical Chemistry at the A.S. Chemical Laboratories Inc. as Chief Scientific Officer. He has published over 45 research papers in the peer international Journals.

Currently, Dr. Mirza is also serving as the National Secretary Ta'lim (Education) at the Ahmadiyya Muslim Jama'at.

Ethics approval and consent to participate: No ethical approval needed for this research work.

Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/or incorporated in this study is included in this manuscript.

Key words: Research Aspects, Holy Quran.

He then moved to McGill University and did post doctoral fellowship in Protein Engineering Center of Excellence at Pulp and Paper Research institute. Since 2004, he is teaching at the Department of Chemistry at York University. Dr. Mirza is also involved in the applied research in area of Pharmaceutical Chemistry at the A.S. Chemical Laboratories Inc. as Chief Scientific Officer. He has published over 45 research papers in the peer reviewed international Journals.

Currently, Dr. Mirza is also serving as the National Secretary Ta'lim (Education) at the Ahmadiyya Muslim Jama'at.

Abstract

Holy Qur'an is a revelation from God that contains facts and universal truth encompassing all domains. The Holy Qur'an invites believers again and again to ponder on its message and find treasures hidden within. Since the Prophet's time, Muslims have been finding guidance to discover new horizons in the fields of arts, science, engineering and medicine. This talk will present an overview of how one can initiate a research based on the Holy Qur'an. Three different research methods will be discussed to illustrate areas of scientific discoveries that can be traced to the Holy Qur'an and thus to predict the future research directions and discoveries that can be made by pondering on the Holy Qur'an.
