Competing Interest

The authors declare no competing interests.

Additional information is available at the end of the article.

Ethics approval and consent to participate: No ethical approval needed for this research work.

Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/ or incorporated in this study is included in this manuscript.

Key words: Revelation, Human Brain.

Speakers Profile

Mr. Ansar Raza has served as a teacher in Ahmadiyya Missionaries Training School (Jamia Ahmadiyya Canada) and as an editor of English Section of Ahmadiyya Gazette Canada. Presently he is working as a research scholar and Missionary in Vaughan

Abstract

Allah says in the Holy Qur'an that He communicates to humans in three ways: And it is not for a man that Allah should speak to him except by revelation or from behind a veil or by sending a messenger to reveal by His command what He pleases. Surely, He is High, Wise. [42:52]

The Promised Messiah writes that human brain is wired in such a way that it can communicate with the Divine:

"The Wise Creator has so fashioned the human brain and has so invested it with the spiritual faculties that it can see some true dreams and can receive some true revelations. But these dreams and revelations are not an indication of any spiritual rank or greatness, but are only a sample of the way through which progress could

be made.” (Haqiqatul Wahi RK Vol-22 P-10)

Hazrat Kalifatul Masih-IVrh writes:

“If we widen the scope of our study, we observe that many authentic cases of revelation are also reported outside the domain of religion. For instance, there are many interesting cases of highly complex information conveyed through revelation to some scientists” [RRKT- P:23

Three scientists have come to the same conclusion that human brain is wired to receive Divine communications:

- (1) The God Gene – How Faith is Hardwired into our Genes – by Dean H. Hamer;
- (2) Why God Won't Go Away: Brain Science and the Biology of Belief – by Andrew Newberg; and
- (3) The “God” part of the Brain: A Scientific Interpretation of Human Spirituality and God – by Matthew Alper
